UJCYCLUB CTF-Writeup

(LayanK)
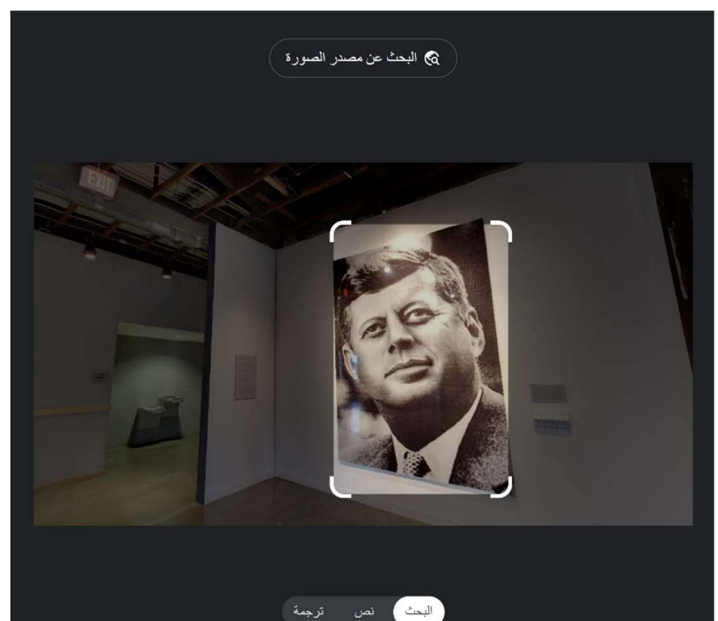

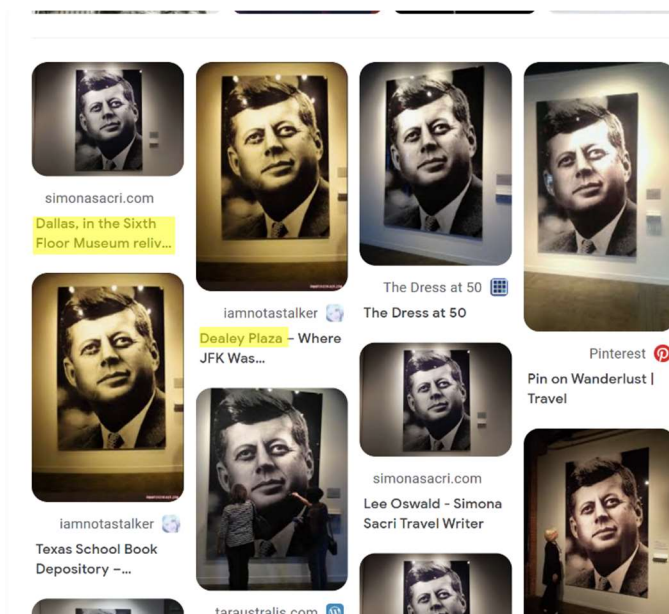

JFK Challenge category: OSINT

The image provided :

Solution: The first thing that occurs to my mind when I see an OSINT challenge like this is putting the picture in Google reverse image search.

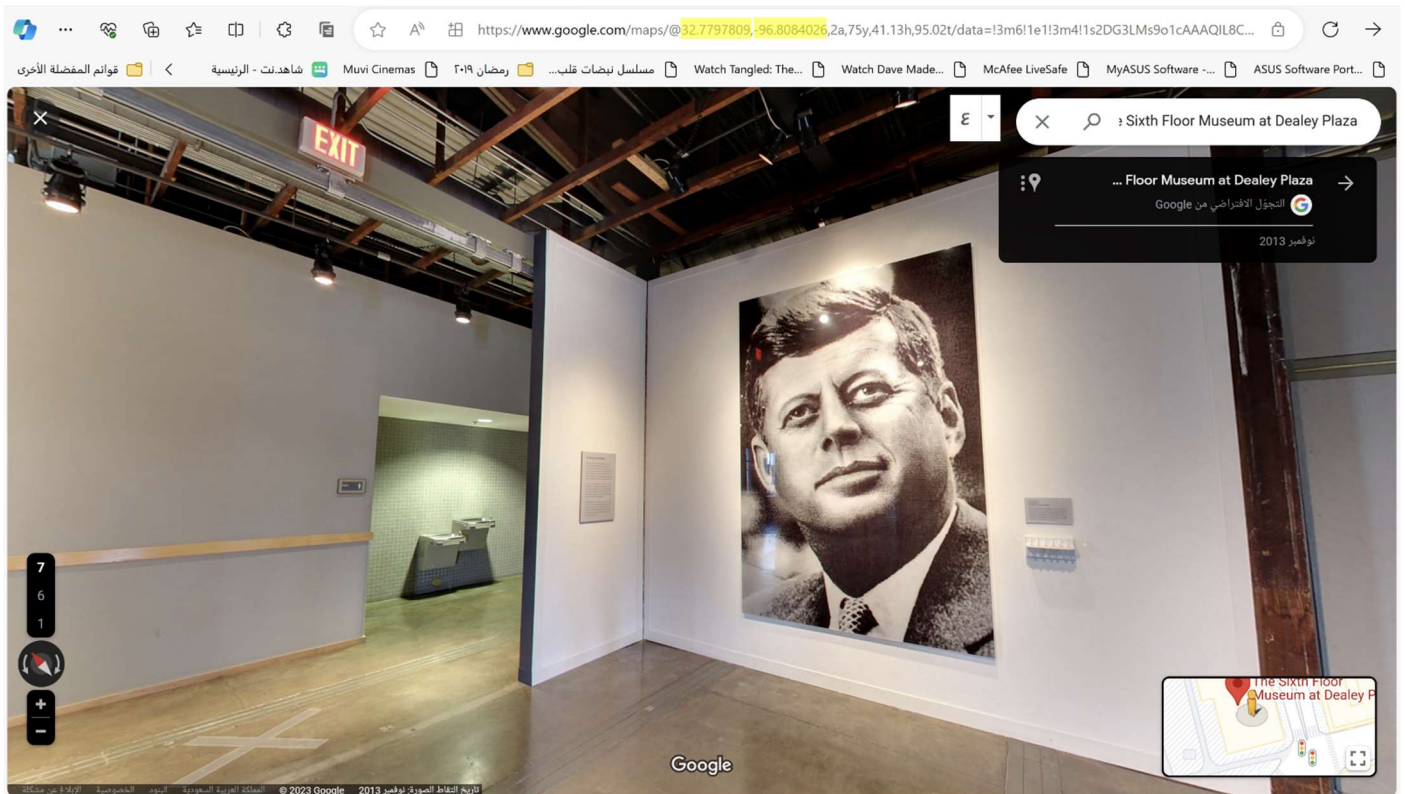

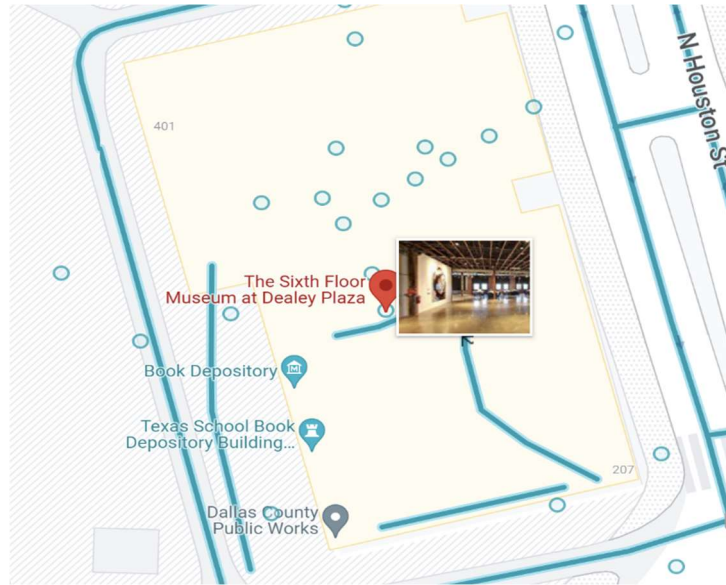

The search results showed that the picture is located at the sixth floor museum at Dealey Plaza Dallas on the seventh floor, so next we need to search for that location in Google Maps Street View or Google Earth to get the exact coordinates of the picture.

in Google Maps, click on the small yellow icon at the lower left corner

Of the screen to enable the street view.

After searching in the maps, you will find the exact place of the image

Get the coordinates from the URL at the top, and now you got the flag.
